November 18, 2010 - SENCO is revolutionizing the power fastening category with the introduction of the F-15 Finish Nailer featuring the company's ground-breaking Fusion Technology.

The F-15 is the first cordless pneumatic finish nailer providing the power and consistency of an air tool with the added convenience and portability of a cordless tool. No gas.

No hoses. No battery ramp-up times. Just maximum job-site performance and portability. "The unique design of the F-15 nailer will be welcomed as ideal for trim crews, remodelers, punch-out teams and serious DIYers who don't want the hassle of a hose and compressor but still want the benefits of a pneumatic tool," declares Dan McKenna, Vice-President, Sales & Marketing, Canadian Industrial Distributors. The SENCO F-15 includes an on-board 18V Lithium Ion (LiFePo4) battery that can attain an 80% charge in just 15 minutes. The tool's patented design provides an instant trigger response and delivers up to 500 drives between charges. Utilizing 130psi of self-contained compressed air as the driving method, when the trigger is pulled the F-15 delivers the power and feel associated with pneumatic nailers. The battery, assisted by a gear box and lifter, returns the piston and driver blade to the 'ready' position to drive the next fastener. It's capable of driving 15-gauge finish nails powerfully and consistently, even into hard woods. The air pressure is pre-set at the factory, permanently sealed and never needs recharging. Among the F-15 tool's many features, users can choose between sequential or contact actuation, depending on the job. The tool-free, adjustable depth-of-drive feature combined with the nose mounted ED work surface light ensures accurate fastener placement and counter sinks. The EZ-Clear removable magazine makes fastener removal a breeze. The F-15 also features a robust 1/4" aluminum drive cylinder and durable over molding. At 6 pounds, the ergonomically balanced nailer is nearly 2.5 pounds lighter than competitive models (thanks in part to the Lithium Iron Phosphate battery), and can be comfortably operated with one hand. The SENCO F-15 Cordless Pneumatic Finish Nailer, as well as thousands of other construction and industrial products, is available from coast to coast in Canada at Canadian Industrial Distributors' 1700 dealers and at their regional distribution offices. For more information call 1-877-280-0243 or visit the CID website at [www.cid.ca](http://www.cid.ca).
